

BBP Blakes Building Profiles

The Original

**Brickie's
Best Friend**

SUPERIOR QUALITY * ESTABLISHED OVER 40 YEARS

**Lay to the line
and save your time**

Blakes Building Profiles

BBP

Can be erected after three courses have been laid and allowed to set overnight.

Setting device supports profile while Datum is accurately set.

Erected and ready for use in less than a minute.

Guaranteed precision yet simple to use.

EXTERNAL PROFILE

Essential for accurate and quality brickwork.

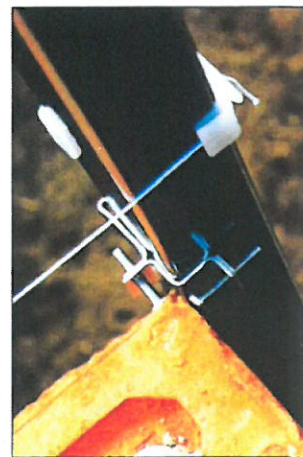

Two clamping arms secure profile to brickwork.

Plumbing is achieved by means of the two lower adjusting screws.

The profile does not mask the brickwork in anyway, enabling all pointing or 'rubbing-in' to be done as work progresses.

A 'Snap on' Stabiliser prevents any movement by line tension.

Thousands of
Blakes Building Profiles
are in use daily throughout the world.
Our vast number of satisfied customers
all agree on the following facts.

- ★ TOP QUALITY CONTROLLED BRICKWORK EVERYTIME
- ★ HIGHER RATE OF PRODUCTION
- ★ ESSENTIAL FOR INCREASED EARNINGS AND SAVING COSTS
- ★ MANUFACTURED TO LAST

INTERMEDIATE PROFILE

Master of many operations.
Indispensible for:-

- ★ TAILING OUT FROM CORNERS
- ★ INTERNAL CORNERS
- ★ TINGLES
- ★ PARTY WALLS
- ★ GABLE ENDS
- ★ SQUINT CORNERS, ETC

Above: Using Vertical Joints on alternate courses, perfect squint courses.

Above right: As used on gable ends or as plumbing points on long wall construction.

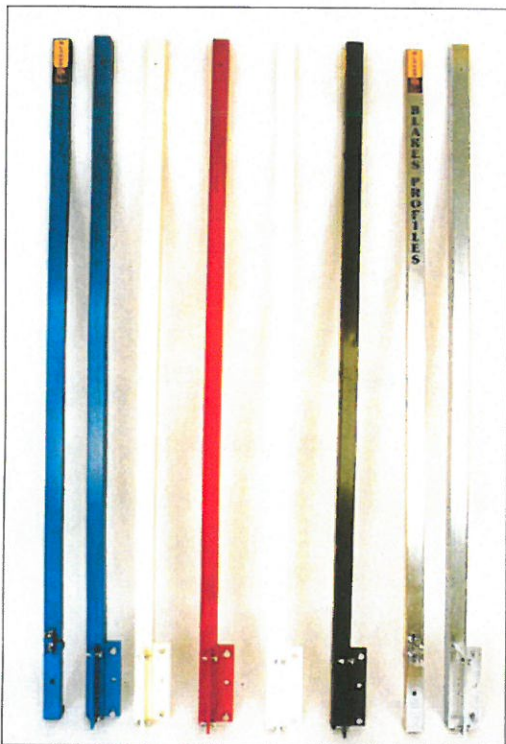

Bottom right: Intermediate stabiliser in position.
